To,  
**Justice Devaraju Nagaraju**  
Chairman,  
Telangana State Electricity Regulation Commission  
Hyderabad.

Date : 04-03-2025

Respected Sir,

**Human Rights Forum** is a citizens' voluntary body, that works on violation of citizen's rights and campaigns on protection of human rights of the people in both the Telugu States.

Our Forum brings the following information to your notice to examine and make appropriate suggestions to Telangana State Electricity Board.

1) In many villages of Telangana the transformers are not properly fenced to protect from electrocution. As a result there are accidents to the tune of loss of life.

2) In many villages the electric supply live wires are not properly fitted and find hanging in the fields and beside the village roads.. Recently three persons died in Nizamabad District, as they came in contact with hanging live wire in an agricultural field. (Our fact finding report is separately submitted)

3) The Distribution system in the villages is very chaotic with low/high voltage fluctuations.

4) Earlier B.R.S Government announced free electricity, to Dhobi and Barber communities, who are running small establishments. Now the field level Bill Collectors are pestering these communities to pay bills.

They say, it appears, that the Govt. is not paying to the Board, reimbursed amounts.

Our Forum requests you to examine the above issues and issue appropriate orders to the Electricity Department.

Yours' Sincerely

  
(Dr. Thirupathaiah)  
(State General Secretary)
