COMPLAINT NO.02

దరఖాస్తుదారుని పేరు మరియు వివరాలు: R.V.Subba Rao, Tarnaka, Secunderabad

విషయము: Objections and Suggestions on CESS Limited ARR Filing for FY 2026-27

Prayer for Consolidation with TGNPDCL

సమస్య - సలహా

క్ర.సం	విషయము	వివరణ
1	CESS Limited has demonstrated persistent and increasing dependence on Government subsidy, with a widening revenue gap, and is therefore not financially sustainable as a standalone distribution licensee under the framework of the Electricity Act, 2003 and the applicable MYT/ARR Regulations of the Hon'ble Commission.	1.It is to bring your kind notice that the CESS.ltd. Sircilla area of operation consists of entire Rajanna Sircilla District which is completely rural area and in the area entire agriculture is depends on bore wells, as per your obligation that year by year CESS is depending on Government subsidy and CESS is not financially sustainable is not correct. It is to bring to your kind notice that in 2014 the agriculture consumption was 352.85MUs it has been grown to 717.95 MUs by the end of FY 2024-25 it is 103.47% increase. As a part of the Government policy to free power supply to the Agriculture sector simultaneously increase the tariff subsidy borne by the Government on free power to Agriculture section as well as cross subsidy to domestic consumers, it does not mean that the CESS. Ltd. is depending on Government Subsidy for sustainability. This point may kindly be noted.
2.	Operational performance indicators, including O&M cost trends, capitalization levels, AT&C losses and absence of technology investments (smart metering, SCADA, GIS, digital systems),reveal systemic inefficiencies and a lack of modernization consistent with the standards imposed on other DISCOMs in Telangana.	2.The CESS.Ltd. sircilla operational performance is good as mentioned in suggestion (smart metering, SCADA,GIS digital systems) in DISCOMs also in rural areas there is no smart metering, SCADA CESS.Ltd. is utilizing all the digital systems to serve its member consumers in best manner.

3.	Governance and management capacity at CESS are inadequate for planning and implementing complex sectoral reforms, particularly demand side management (DSM), smart metering roll-outs and technology-driven loss reduction measures. Most staff remain oriented to conventional, manual operations with negligible exposure to structured capacity-building and modern distribution practices.	3.CESS. Ltd. is implementing phase manner all the sectoral reforms.
4.	No financial institutions are coming forward to sanction new loans to CESS in view of its weak financial position, which effectively blocks access to capital for network strengthening, system improvements and technology up gradation, thereby locking in current inefficiencies.	4. It is not correct that no financial institutions are coming forward to sanction loans to CESS. Ltd. It is bring to you kind notice that CESS did not approached any financial institutions of sanction of loans. The REC. Ltd. New Delhi has sanctioned loan to CESS for implementation of HVDS system in agriculture sector.
5.	In contrast, TGNPDCL already operates at scale with established systems for DSM, smart metering, SCADA, GIS, and consumer-centric service delivery, and is better placed to ensure reliable supply, efficient subsidy management (particularly for agriculture), and compliance with the Hon'ble Commission's directives.	5.CESS. Ltd. Sircilla is supplying reliable supply to its member consumers and time to time implementing Hon'ble Commission's directives.
